# CHAPTER 2

## Prevalence of Kidney Failure with Replacement Therapy

Summarising the number of prevalent kidney replacement therapy patients in Australia and New Zealand, the prevalence rate per million population and the demographics and clinical characteristics of prevalent patients

## SUMMARY AND HIGHLIGHTS

The prevalent patients undertaking Kidney Replacement Therapy (KRT) in Australian and New Zealand continues to steadily increase, reaching 29,025 people (1117 per million population) in Australia and 5474 (1069 per million population) in New Zealand in 2022. The greatest prevalence rate was among people aged 75-84 in Australia with a prevalence of 2995 per million population, whereas in New Zealand this was those aged 65-74 with a prevalence of 2732 per million population.

Kidney disease requiring KRT continues to disproportionately impact First Nations people. In Australia, the prevalence of dialysis amongst Aboriginal and Torres Strait Islander people is 2441 per million population compared with 519 per million population for people who are not of Aboriginal and Torres Strait Islander ethnicity. In New Zealand, the prevalence of dialysis in Māori people is 1071 per million population compared with 515 per million population in non-Māori people. The rates of KRT on dialysis remains relatively stable amongst Aboriginal and Torres Strait Islander people and Māori people in Australia and New Zealand respectively, with a steady rise in the prevalence of people with kidney transplants in both groups.

Calciphylaxis episodes in patients on KRT were collected by ANZDATA from 2019. A greater number of calciphylaxis episodes have been reported in patients on haemodialysis compared to those on peritoneal dialysis.

Australia and New Zealand Dialysis and Transplant Registry, Adelaide, Australia. 2023. Available at: <http://www.anzdata.org.au>

# ALL KIDNEY REPLACEMENT THERAPY MODALITIES

Table 2.1 shows the number of prevalent patients treated with kidney replacement therapy (KRT) in Australia and New Zealand over the last 20 years. The prevalence per million population (pmp) is also shown. Table 2.2 shows the same data for the last 5 years, but with dialysis modality categorised.

Population estimates for Australia and New Zealand used throughout this chapter for the calculation of prevalence per million population were sourced from the Australian Bureau of Statistics (2022)<sup>1</sup> and Stats NZ (2022)<sup>2</sup>.

Table 2.4 shows the prevalence (pmp) of KRT by state/territory over 2018-2022. State is based on the state of the treating hospital.\*

\*NSW population estimates exclude residents of the NSW South Eastern region which includes the local government areas of Bega Valley, Eurobodalla, Goulburn Mulwaree, Hilltops, Queanbeyan-Palerang Regional, Snowy Monaro Regional, Upper Lachlan Shire and Yass Valley. ACT population includes residents of the NSW South Eastern region. The population base for the NSW South Eastern region is based on the estimated resident population by local government area from the Australian Bureau of Statistics (2023)<sup>3</sup>.
