

Expression of Interest

2025 Trainee Research Projects Program (ATRPP)

ANZSN and ANZDATA are thrilled to announce Expressions of Interest (EOI) for the 2025 Trainee Research Projects Program (ATRPP) are open!

Deadline for EOI submissions: **Friday, 14th of March 2025**

Five successful projects are eligible to receive epidemiological and statistical support to answer important research questions related to dialysis and kidney transplantation priority areas. These projects must be collaborative in nature and be completed by the end of the 2nd year of RACP Nephrology Advanced Training.

The **ATRPP** is ANZSN/ANZDATA's signature **trainee research program** (program) designed to increase the capacity of trainees to undertake research using data from the ANZDATA Registry and develop their statistical skills.

The program aims to drive capacity within the Registry and in particular, provide statistical support for trainee research projects and enrich registry quality assurance activities, all of which align with the ANZSN pillars of research, education and advocacy.

The program is anticipating a high calibre of trainee project proposals from across Australia and New Zealand.

While projects must be led by a Trainee, it is desirable Trainees have one or more supervisors for the project locally. Trainees and/or their local supervisors should have a research idea or an area of interest. ANZDATA and the ANZSN-ANZDATA Clinical Epidemiology Fellow can assist in developing and refining a suitable research project that uses data from the ANZDATA Registry in conjunction with the trainee.

- Preference will be given to:
 - Trainees earlier in RACP Nephrology Advanced Training (1st or 2nd year Advanced Training) with the aim of completing the research project for submission to fulfil training requirements
 - Trainees based at hospitals/institutions without local statistical or research support (See Policy 2.8: [Guidance on statistical support for external researchers](#))
- If the number of trainees seeking statistical support exceeds the available capacity, then trainees will be selected by delegates from ANZDATA and ANZSN with an aim to balance the above requirements and ensuring diversity.

Expressions of interest should be forwarded as:

1. A brief cover letter outlining a research project idea or topic area and name of local supervisor/s
2. A copy of your current CV
3. Send via email to anzdata@anzdata.org.au
